

Cut around the nets.
Score the dotted lines to help with folding.
Stick nets A and B back to back
Glue together to create the model above

At 2.22 km long, the Humber Bridge was the longest single-span suspension bridge in the world when it opened in 1981, a record it held for 16 years. It stands at 155.5m tall and uses over 71,000 km of suspension cable, enough wire to go around the Moon more than six times. Every year the bridge carries more than 10 million vehicles.
